

## Product Bulletin

# ARO 51

### Description

ARO 51 is a highly paraffinic high purity specialty solvent with several interesting features. ARO 51 has a narrow boiling range, low viscosity, high flash point and very low odor potential.

ARO 51 has been used successfully as a dielectric oil in electronic discharge texturing applications and as an aluminum rolling oil.

### Features and Benefits

- High flash point reduces fire hazard
- High purity for specific applications
- Very low volatility
- Excellent viscosity stability
- Low odor and color

### Typical Properties

Appearance	Clear colorless liquid
Odor	Slight
Bulk Density	6.86 lbs/gal
Specific Gravity	0.82 @ 70 °F
Flash Point	248 °F T.C.C.
Distillation Range	486-522 °F

### Application Procedure

ARO 51 is used at full strength and is applied by spray or immersion depending on the application.

Consult Material Safety Data Sheet for a complete description of handling procedures prior to use.
