

Product Data

DURANGO

Description

Durango is a waterborne paint stripper specifically formulated to allow easy removal of uncured water borne paint from walls and floors in the paint booths. The thixotropic formulation allows Durango to cling to surfaces while it works. Furthermore the low VOC content (2.5 lbs./gal.) helps your plant meet the strict specifications of the Clean Air Act.

Features and Benefits

- Can be applied by spray, roll or brush
- Designed to be easily water washable
- Contains no suspect carcinogens
- Clings to walls for complete overspray removal
- Low VOC

Typical Properties

Appearance	Clear, thick liquid
Bulk Density	8.2 lbs/gal
Specific Gravity	0.984 @ 70 °F
Solubility	Emulsifies
Flash Point	105 F
Viscosity	1500 SUS @ 100 °F
V.O.C. Content	2.5 lbs./gal.

Application Procedure

Durango is used full strength and is normally applied by spray. A brush or roller will work almost as efficiently. Different applications may require different coating thickness'. The recommended thickness of the wet film is from 10 to 20 mil. Once applied, Durango should be left in contact with the overspray for a minimum of five minutes and as long as twenty minutes before rinsing. Good rinsing can be obtained with normal water pressure, however moderate to high-pressure gives the best results.
