

## Product Data

# Kleen All 500

Kleen All 500 is a solvent cleaner specifically formulated to efficiently remove uncured paint. This cleaner is used to remove paint deposits in places such as paint booth steps, hallways, safety rails and other surfaces and equipment where a paint stripper would be inefficient or cannot be used. Kleen All 500 is also an excellent degreaser for oils, tar, and grease on hard surfaces like metal and concrete. Use of Kleen All 500 eliminates the need for flammable thinners. Because the product is emulsifiable in water it is easy to clean up with a water rinse.

### Features and Benefits

- Can be applied by rag, brush or spray gun
- Designed to be easily water rinsable
- Contains no suspect carcinogens
- High flash point of 105 °F

### Typical Properties

Appearance	Clear liquid
Bulk Density	7.2 lbs/gal
Specific Gravity	0.87 @ 70 °F
Solubility	Soluble
Flash Point	105 °F PMCC
Viscosity	<10 SUS @ 75 °F
V.O.C. Content	7.2 lbs./gal.

### Application Procedure

Kleen All 500 is used full strength and is normally manually applied by rag. A brush, roller or spray gun will work almost as efficiently in some applications if it is scrubbed after application. Good rinsing is usually achieved by going over the work area again with a rag wet with clean water or by spraying down the area with normal water pressure, however moderate to high pressures give the best results.
