

Product Bulletin

Plus Solvent

Description

Plus Solvent is a high purity specialty solvent with several interesting features. Plus Solvent has a narrow boiling range, low viscosity, high flash point and very low odor. The highly refined solvent has a low level of impurities to minimize contamination or incompatibility, with no detectable quantities of aromatics, heavy metals or chlorinated compounds. Use Plus Solvent to remove rust preventive oils, rolling oils, and a variety of shop soils from metal surfaces at low temperatures.

Features and Benefits

- High flash point reduces fire hazard
- High purity for specific applications
- Very low volatility
- Excellent viscosity stability
- Low odor and color
- Eliminates flammable thinners

Typical Properties

Appearance	Clear colorless liquid
Odor	Slight
Bulk Density	6.59 lbs/gal
Specific Gravity	0.79 @ 70 °F
Flash Point	143 °F T.C.C.

Application Procedure

Plus Solvent is used at full strength and is applied by spray or immersion depending on the application.

Consult Material Safety Data Sheet for a complete description of handling procedures prior to use.
