

Product Bulletin

Rainkote 110

Rainkote 110 is an oil based rust preventive used for the protection of steel or cast iron parts during indoor storage for a period of up to one year. The oily film deposited by Rainkote 110 is self healing and lubricating making it ideal for the storage of parts prior to assembly.

Features and Benefits

- Oily film is lubricating to aid in subsequent assembly of parts
- Self healing film continues to provide protection after handling
- Contains no solvents reducing odor and fire concerns
- Displaces water for application over wet surfaces
- Residual film is easily removed with alkaline cleaners

Typical Properties

Appearance	Dark Brown liquid
Bulk Density	7.4 lbs/gal
Solubility	Insoluble
Flash Point	225 °F
Viscosity	90 SUS @ 100°F

Application Procedure

Rainkote 110 is normally used full strength but can be diluted with equal parts solvent (mineral spirits or similar) to reduce viscosity and film thickness. It can be applied by spray, or immersion. The product displaces water and so there is no need to wait for the surface to dry prior to application. Rainkote 110 can be removed with an alkaline cleaning solution.

Consult Material Safety Data Sheet for a complete description of proper handling procedures.
