

Product Bulletin

Rainkote 375

Rainkote 375 is a solvent and oil based rust preventive which dries quickly leaving an ultra-thin oily film suitable for the protection of steel parts during indoor storage for a period of up to one year. The thin oily film is well suited for applications on freshly machined surfaces where parts are to be assembled after storage or where easy removal of the film is a concern.

Features and Benefits

- Ultra-thin film facilitates handling of coated parts
- Protects steel, galvanized steel and cast iron
- High flash point reduces fire hazard
- Displaces water for application over wet surfaces
- Residual film is easily removed with alkaline cleaners
- Contains no Barium or other heavy metals

Typical Properties

Appearance	Brown liquid
Bulk Density	7.0 lbs/gal
Solubility	Insoluble
Flash Point	140 °F
VOC	3.9 lbs./gal.

Application Procedure

Rainkote 375 is used full strength and is applied by spray, or immersion. The product displaces water and so there is no need to dry the surface prior to application. Rainkote 375 can be removed with an alkaline cleaning solution.

Consult Material Safety Data Sheet for a complete description of proper handling procedures.
