

Product Bulletin

Rainkote 72 SP

Rainkote 72 SP is an inert emulsion based rust preventive for use in spray washers and dip tanks. The resulting thin oily film provides indoor protection of steel, cast iron, or galvanized surfaces for up to one year. It is particularly suited to applications where easy film removal is important.

Features and Benefits

- Low foaming for use in spray washers or agitated tanks
- Residual film is ultra thin and easily handled
- Residual film is easily removed with hot water
- Low pH minimizes hazard for workers
- Applicable on all metals

Typical Properties

| | |
|---------------------|-----------------------------|
| Appearance | Thick white liquid |
| Bulk Density | 8.0 lbs/gal |
| Specific Gravity | 0.96 @ 70 °F |
| pH (@ 5% by volume) | 8.5 |
| Flash Point | none to boiling |
| Humidity Cabinet | > 60 days at 98 % RH, 98 °F |

Application Procedure

Rainkote 72 SP should be used full strength. It can be used between 80 and 180 °F. Higher temperatures reduce drying time.

Concentrations can be determined by refractometer or by acid split.
