

Product Bulletin

X-Press

X-Press is a water dispersible rolling oil for all hot mills. The product is formulated with highly refined fatty oils to provide for low roll wear, scale reduction, reduced loads, and improved surface finish. X-Press mixes with water quickly to form a semi - stable low foaming dispersion.

Features and Benefits

- Exceptional lubricity for reduced loads
- Reduces scale
- Improves surface finishes
- Anti-wear properties extend roll life
- Reduces downtime

Typical Properties

Appearance	Dark brown liquid
Flash Point	350°F Minimum
Pour Point	< 40°F
Viscosity	575 SUS @ 100°F
Bulk Density	7.6 lbs/gal

Application Procedure

X-Press is injected directly into roll cooling water. The rate of addition will vary with mill type, metal composition, and speeds and ranges from .25 to 1 pound per ton.

Consult Material Safety Data Sheet for a complete description of proper handling procedures.
