NBC Cleaner

NBC Cleaner is an innovative water-based system for the rapid removal of oily, greasy, waxy and particulate soils in a wide range of applications. NBC Cleaner is low foaming, multi-purpose, neutral and biodegradable. NBC Cleaner uses a dynamic surfactant that quickly wets and penetrates to remove carbon, dirt, grease, grime and oil from concrete, metal, plastic, glass, rubber, painted and unpainted surfaces. This new technology outperforms traditional glycol ether, solvent and surfactant containing systems, while maintaining a superior health and environmental profile. This product is highly concentrated, contains no phosphates, silicates, silicones, butyl or glycol ethers or solvents of any kind, acids, caustics, or nonylphenols. NBC Cleaner has no VOC, is non-toxic, non-corrosive and non-hazardous. NBC Cleaner also splits out waste oils and insolubles rapidly to allow easy separation. NBC Cleaner is safe to use anywhere and will leave surfaces streak and smear free.

Features and Benefits

- No harmful or corrosive fumes or odor
- Safe on all metals and plastics
- Removes carbon, oils, dirt and soil
- Nonflammable
- Dynamic surfactant system
- High concentration for multiple uses
- Non-toxic
- Non VOC
- Biodegradable
- Low Foam
- Neutral pH

Typical Properties

Appearance	Slightly hazy Liquid
Bulk Density	8.4 lbs/gal
Specific Gravity	1.012 @ 70 °F
pH	7 - 8
Solubility	Complete
VOC	0 lbs per gallon

Application Procedure

NBC Cleaner can be used diluted 1 to 2 with water for cleaning carbon deposits or 1 to 5 for heavy degreasing or floor cleaning. Dilute with up to 100 parts of water for light to medium cleaning depending on the soil level. Apply with brush, mop, sponge, spray or immersion.

Consult Material Safety Data Sheet for a full description of proper handling procedures.
