SR-71

SR-71 is an innovative water-based system for the rapid removal of oily, greasy, waxy and particulate soils in a wide range of applications. SR-71 uses a dynamic surfactant that quickly wets and penetrates to remove carbon, dirt, grease, grime and oil from metal, plastic, glass, rubber, painted and unpainted surfaces. This new technology outperforms traditional glycol ether, solvent and surfactant containing systems, while maintaining a superior health and environmental profile. SR-71 has ultra-low VOC, is non-toxic, non-corrosive, non-hazardous and biodegradable. SR-71 also splits out waste oils and insolubles rapidly to allow easy separation. SR-71 is safe to use anywhere and will leave surfaces streak and smear free.

Features and Benefits

- No harmful or corrosive fumes or odor
- Safe on all metals and plastics
- Removes carbon, oils, dirt and soil
- Nonflammable
- Dynamic surfactant system
- Multiple uses
- Non-toxic
- Low VOC
- Biodegradable

Typical Properties

Appearance	Clear Liquid
Bulk Density	8.5 lbs/gal
Specific Gravity	1.020 @ 70 °F
pH	11.2
Solubility	Complete
VOC	0.05 lbs per gallon

Application Procedure

SR-71 can be used straight or diluted 1 to 1 with water for cleaning carbon deposits or for heavy degreasing. Dilute with up to 50 parts of water for light to medium cleaning depending on the soil level. Apply with brush, mop, sponge, spray or immersion.

Consult Material Safety Data Sheet for a full description of proper handling procedures.
